Preface

The compilation of our children's work is a celebratory souvenir to mark the work done during the 2 year Micro-Scholarship program (2011-2013). The English Access Micro-scholarship program, cosponsored by the Aga Khan Development Network and The American Embassy is being implemented in the Hazrat Nizamuddin Basti as a part of the larger Project: Humayun's Tomb-Sunder Nursery-Hazrat Nizamuddin Basti-Urban Renewal Initiative.

This is not just any souvenir. It is "of the students, for the students and by the students" and that's why it is so special. It is a reflection of their ideas, hard work and creativity.

We have delved into the work done by our students to pick out articles, letters, mind maps, vocabulary webs, illustrations etc. to give our readers a bird's eye view of the English language teaching and its outcome as seen in their work.

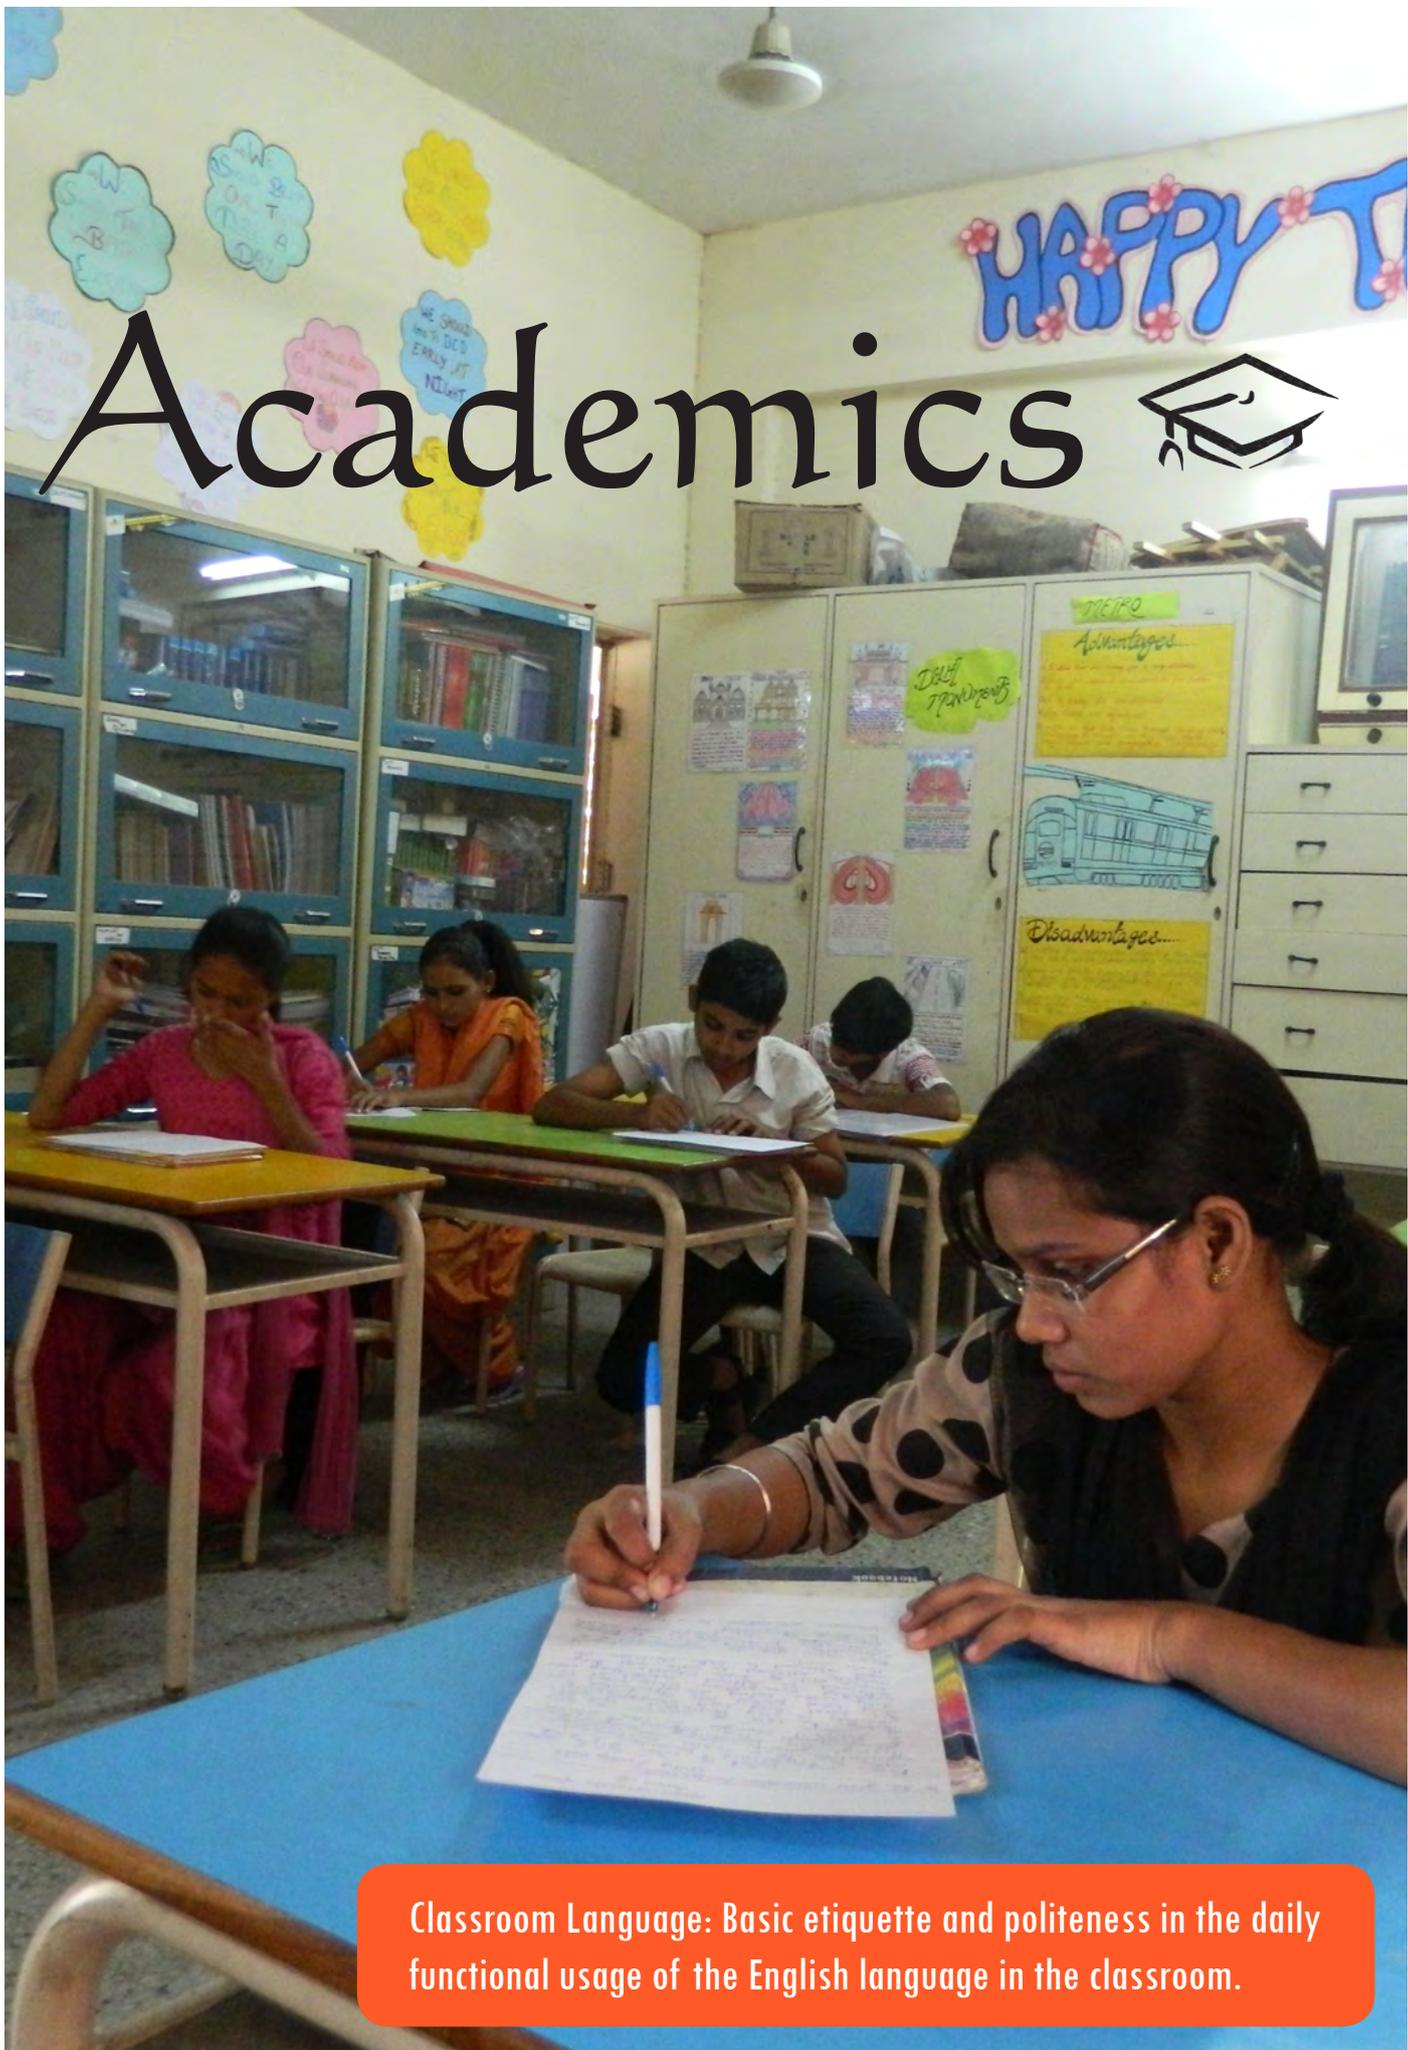

The souvenir will reflect the wide and relevant exposure given to the students to make them responsible global citizens and informed Indians with a strong sense of responsibility, all this with the primary aim of teaching them the English language and making them comfortable in its usage.

We hope you enjoy reading this as much as we have enjoyed putting it together!

Thanking you

English Access Micro-scholarship Program Team

Think & Discuss

What can I change one thing about my society?

I would like to change bribe system in my country because everywhere there is a bribe system. Whenever you go you have to give bribe for ex. in school admissions. All the parents faces many problems during their children admission. Without bribe is not possible to getted their children's admission in school.

THINK AND

DECIDE

You could meet one famous person either alive or dead. Who would be that person? Why you want to meet him/her?

Mahatma Gandhi is known as the father of our nation, because he always worked for others, even, without any personal interest. He followed the path of truth, peace and non-violence. He had a sharp mind and without resorting to violence he helped India to get freedom from the britishers. He has proved as a good leader as he had the abilities to persuade the people, to join various movements so as to drive the britishers away from India. He was a good writer also and his writing are a source of inspiration. He worked a lot for down trodden and make them equal with the other people of our society so I want to meet him and may be live with him for a few days to learn more about the various facets of his life.

Discuss And Decide

Q If you can change one thing about your Society or Country. What will it be & why? Give 2 Reasons?

Ans If I can change one thing about our Society it will be **NOISE** Pollution. Because noise Pollution is a big thing. Our Society like in the marriages people burst crackers and play D.J. I really hate loud music, it people have no needs to blow horns but they are using without reason honking horn now day I'm asking my friends and others people. Do you like loud music cars and unnecessary horns? they are give me ans! No friend: in the one sound. No we hate this, so really want to change this things it will go with my friends and others people and a complaint to head office of noise Pollution, I know all the thing will not change but I'm sure at least a few will definitely change. I really hope.

Yesterday, Me and Heena were walking on the road, suddenly we found 5,000 ₹ notes, first of all we checked these whether these are real or fake, then I pinched Heena to see that are we looking a dream or is it real, we found it is real. Public Speaking

If I could invent something

I would like to invent some powers in me, that would help me whenever I am in trouble & whenever I need them.

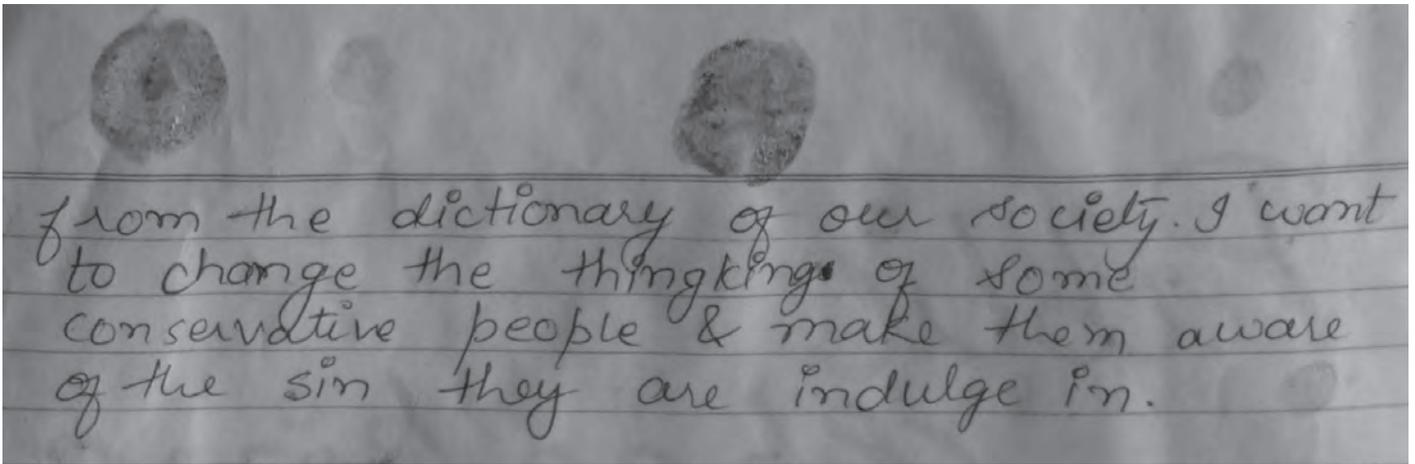

I want these powers especially for the evil things that are making the society hollow like corruption, child labour, discrimination between male and female,

higher caste & lower caste, rich & poor, female foeticide, female infanticide etc.

These evil things are causing harm to our society. As we have become modern, there is great change in our minds & thinkings. But there are some people who still follow these evil things.

So, I want to erase these evil things

DEBATE

'JUNK FOOD IS GOOD'

Junk food is unhealthy but is quick and easy to eat.

Junk food saves time.

Healthy food is not very tasty. It is also very boring.

I like eating Pizza because I don't need to cook it in my house. I order at Pizza hut and it comes in 30 minutes.

Sandwich is very healthy because it has vegetables which give us vitamins and calcium.

We should not eat junk food daily. We can eat them only in weekends.

The month of Ramadan is the one in which the Qur'an was sent down as a right guidance to mankind with the clear signs of distinction of truth from falsehood. The holy month of Ramadan is the ninth month of Islamic calendar. It is engulfed with piousness as Allah bestows his mercy and blessings on one and all. The spirits of the month seem to come alive with feasting and fasting so that people can appreciate all the beautiful creations of the lord while enjoying them thoroughly. Muslims prepare special foods and buy gifts for their family and friends and for giving to the poor and needy who cannot afford it. This pious month helps add meaning to life as one asks for happiness and imparts it to the others.

ENVIRONMENTAL POLLUTION

While you were coming to this venue today did you notice things around you like trees, plants, shrubs, greenery all over. How did you feel about it even I did notice and I felt very happy but there was something which is irritating me. The smoke from the vehicles, honking horns and dirty puddles which can be a cause of many diseases. Today I am talking about environmental pollution which is a biggest threat to human race in our planet. It means adding impurity to environment, the environment consists earth, water, air plants and animals. If we pollute them then the earth will be in danger. Its true our earth becoming warmer and been constantly polluted. Do you know why and who is polluting it. We all polluted it. I will tell some causes of pollution firstly about air pollution. The biggest cause of air pollution is smoke, which is released by factories and industries. They released very harmful gases like carbon dioxide, carbon mono oxide, mythane etc. these all are poisonous gases and cause lung cancer, tuberculosis etc which takes a heavy toll of life. Then, Noise pollution, the harsh sound of buses and cars and loud music is a biggest causes of noise pollution. Its effect our power of hearing and cause trouble. It has been reported that in Kolkata there are thousands of people who lost their power of hearing by the buses and cars sound loud music and the frequency sound of plane coming in and going kolkata's airport. Now we come to water pollution in our planet there are many oceans and rivers but it has been constantly polluted by dangerous chemicals. water mills and factories released very harmful chemicals and water into many rivers and ocean after that people uses it which cause harmful effects. So please realised a danger and don't pollute our beautiful environment.

Khalida's Speech of YLP

Respected teachers and my dear friends. A very good morning to one and all present here.

My name is Khalida and it will give me an immense pleasure to deliver a speech on such an important topic that is women's education in society. Education is a main instrument through which we can narrow down the prevailing inequality and accelerate the process of economic and political changes in the status of women. Today the role of women in our society is very important but in the past they had struggled a lot. They had faced lots of problem. They were being discriminated and exploited everywhere, they were not allowed to seek education or to move out of their houses, they were neither allowed to vote nor they were allowed to take decision on their own but now things are definitely changing for the better. Today women have gone out into the space, they are walking shoulder to shoulder with men, and they are now top level scientist, managers and leaders. They are now leading countries as Presidents and Prime Ministers. Women's education is a key to a better life in the future. Educating girls is not charity it is good economics and if developing nation want to eradicate poverty they must educate girls. The NATIONAL COMMISSION FOR WOMEN has rightly pointed out that even after 60 years of independence women continue to be treated as the single largest group of backward citizens of India. Today the role of women in our society has not fully understood nor has it been given its full weight age in the struggle to eliminate poverty, injustice, hunger and inequality and do you know who is responsible for this my dear friend, We are the one who are responsible for this, so we need to put our step forward so that we can change the thinking of those people who are against educating girls and then we can bring changes that we want in our society.

As MAHATMA GANDHI has rightly said that

“WE MUST BE THE CHANGE WE WISH TO SEE IN THE WORLD”.

And last but not the least I think our educational system should be use to inculcate new values of equality.

English Access Micro Scholarship Program

The Access Micro-scholarship Programme is part of Aga Khan Development Network's Humayun's Tomb-Sunder Nursery-Hazrat Nizamuddin Basti Urban Renewal Initiative.

It was initiated with the support of the US Embassy to open up avenues for adolescents in the Hazrat Nizamuddin Basti in the age group of 14-16 years by developing their skills to use English language in every day life.

There are over 200 young girls and boys who participated in this program by 2012. The programme innovates teaching-learning techniques and attempts to channelize the creative potential of the students into the learning process.

This souvenir is a labor of love and inspiration – the inspiration comes from the search that hundreds of children are embarking upon the journey to gain fluency in the English language. Having realized that it is the need of the hour, the Aga Khan Development Network and the American Embassy are successfully running the 'English Access Micro Scholarship' program in the Hazrat Nizamuddin Basti. This book is an outcome of the Access Program and showcases and documents some of the work of our children.

This inspired journey has been precious for our Access team and we have emerged happier, more confident and enthusiastic about the change we can bring in the lives of the children by giving them a new language.

We are confident that this program has enriched one students' lives.
